Full stack developer

Graduated from App Academy's intensive 48-week full-stack bootcamp, mastering Python, JavaScript, HTML, CSS, Node.js, Express, and React. Gained hands-on experience in agile methodologies, scrum, DevOps practices, version control (Git/GitHub), project management (GitHub Projects), and collaborative development techniques including TDD and pair programming. Demonstrated rapid skill progression by rebuilding an API project in just one week, reducing development time by 75%.

PROJECTS

Task Wave • 07/2024 - 10/2024

Developed a robust Kanban-style team collaboration tool as part of a group project, showcasing full-stack development skills ->
https://task-wave.onrender.com:

- Implemented dynamic feature functionality using Redux for efficient state management across the application.
- Engineered an innovative solution for managing complex relationships between multiple cards and lists, leveraging Redux's advanced state handling capabilities.
- Designed and built a lightweight, high-performance backend using Python and Flask, demonstrating proficiency in server-side development.
- Utilized Docker for containerization, ensuring consistent deployment and scalability across different environments.
- Applied agile methodologies throughout the development process, contributing to successful team collaboration and project delivery.

Menuable • 08/2024 - 09/2024

App Academy

A menu and ordering React/Express app for small food preparation and delivery services. Developed for small restaurants, food trucks, home food delivery businesses etc. Here, the app is branded as a small food delivery service based in Buenos Aires, Argentina. --->https://menuable-main.onrender.com

- Gained hands-on experience in building and deploying a full-stack application, from conception to production.

LandBnB • 04/2024 - 06/2024

A clone of AirBnB with limited functionality. Full-stack solo project. ->
https://landbnb-n8qv.onrender.com/
